## Read the prompt and respond in English

**PROMPT:** Imagine you are speaking with someone who was raised in another culture, and they have never met a person from this country before, only seen movies from the U.S.

In the conversation, they mention that they are confused about the U.S. perspective on death. **Explain the cultural perspective(s) of people in the United States regarding death**, keeping in mind they have seen U.S. movies, but their culture sees things very differently.
